The following action is in result of a pre-appeal conference requested by applicants on April 5, 2006.

Allowable Subject Matter

Claims 1-3 and 5-21 are allowed. In accordance with MPEP 608.01(n)IV, claims 1-3, 5-11, 19-21, 13, 14, 16-18, 15, and 12 will be renumbered as claims 1-20, respectively.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The prior art of record fails to show or render obvious a drivetrain as defined in claim 1 having a friction clutch that is decoupled in the force-free state; wherein, in the hydraulic line between the master cylinder and the slave cylinder, a pressure relief is provided that sets back a pressure applied between the master cylinder and the slave cylinder when actuated, wherein the pressure relief device is operable by the driver via an actuating device.

After reconsideration, it has been determined that combining the manually-applied, fluid pressure operator of Drexl et al. ('290) in a fluid pressure engaged clutch of the prior art would not have been obvious. Accordingly, the rejections under 35 USC 103 based on Drexl et al. are withdrawn.

Art Unit: 3681

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
